Flotation Requirements

In order to have flotation privileges at NeuroSource, one must become a client of Dr. Foster's at NeuroSource by completing the New Client Paperwork. One must be at least 18 years of age or have parent/guardian sign a release.

This is a list of Requirements one must meet to be considered as a flotation client of Dr. Foster's at NeuroSource:

Requirement #1 – No one who has advanced heart or kidney disease, a pacemaker, seizure disorder or any other condition that may contraindicate floating in Epsom salt water may become a flotation client. It is recommended that potential float clients speak with their health care provider to assess the advisability of floating before floating. **Every client must sign the Release of Liability and assume total responsibility for any and all consequences of floating.**

Requirement #2 - **No one who has their hair colored or had a permanent may float until the perm or color is a minimum of 7 days old. No one who has had a tattoo may float until 7 days have passed since receiving the tattoo.**

Requirement #3 - One must be able to enter and exit tank without assistance, as well as open and close float door without assistance – this requires stepping up onto step and stepping into flotation tank.

Requirement #4 – No one who has Open Wounds, Communicable Diseases or is currently menstruating may float.

One must sign a release of liability stating that they agree to follow all written and orally delivered rules to float. If someone floats with the above contraindicated conditions they agree to pay for all damages to the facilities at NeuroSource.

Requirement #5 – No one using synthetic topical hormones, prescription pain killers or muscle relaxers, illegal drugs or alcohol may float.

NeuroSource reserves the right to deny anyone from flotation services if they appear to be under the influence or acting in any way we consider may make flotation unsafe for them.

Requirement #6– This should go without saying, but ... No One may urinate or defecate in the float tank

Make sure you use the toilet before floating so you don't have to interrupt your float.

Requirement #7 – Everyone MUST Shower before and after floating, using our products.

You MUST take a shower and use our body wash and shampoo BEFORE you float. Please do NOT use conditioner before floating. It is paramount that everyone shower BEFORE floating to keep our float tank as sanitary as possible. We clean and filter the tank after every float, but we want to go the extra mile by REQUIRING everyone to clean thoroughly BEFORE floating.

Requirement #8 – Everyone must relax and enjoy their float!

I, _____ agree to abide by all the requirements in this document, any oral instructions given, and the Release of Liability form.

Date: _____
